## Plastic Air Breather

### PABR7P3W.75

PABR7P3W.75 Plastic Air Breather with visual indicator and replaceable element, 3/4" threaded connection, 3 micron element

This air breather from Schroeder offers two unique features:

- Visual analog indicator that shows the current contamination level as a percentage
- Replaceable element – only the element is replaced, cutting down on the overall operating costs
- Visual indicator shows current contamination levels
- Shows level even when system is shut down
- Replacing just the element cuts down on costs
- Activation of the manual yellow button returns indicator to original setting following element replacement
- Filter element rating 3 µm absolute
- Compatible with commercial industrial hydraulic fluids
- Threaded connection fits 3/4" NPTF
- Range of indication: 0.5 psi (0.035 bar)

Replacement Element P/N = R-PAB7-3

## Air Breather Check (ABC) An Indicator For Your Air Breather

The Air Breather Check (ABC) takes the guesswork out of when to change your air breather because it doesn't care how dirty the air breather looks or how long it's been installed. It only cares how well the breather is working. The air breather check is calibrated in inches of water and will activate, providing a visual indication, when a vacuum equivalent of 15 inches of water (3.75 kPa) is reached. The ABC can be reset simply by depressing the yellow button and used over and over again.
